

BIOSAFETY LEVEL 1 (BSL-1) SPILL

- Notify others in the area to prevent contamination of additional personnel and environment.
- Remove any contaminated clothing and wash exposed skin with disinfectant.
- While wearing gloves, lab coat and face protection, cover the spill with paper towels and pour concentrated disinfectant around the spill, allowing it to mix with the spilled material. Allow suitable contact time of at least 15 minutes.
- Pick up any pieces of broken glass with forceps and put in a sharps container.
- Discard all disposable materials used to clean up the spill into a biohazard bag.
- Wash hands with soap and handwashing disinfectant.
