

SWATSCOPE®

General Instructions for use:

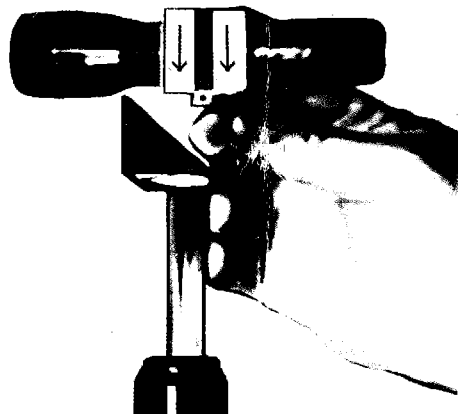

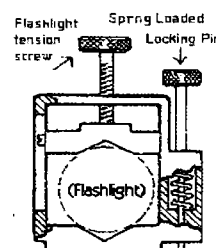

- 1) For a wider field of view, place eyepiece close to your eye.
- 2) Adjust the ZOOM power, then turn eyepiece to focus.
- 3) Use the knob at the bottom of the slide bar for moving the slide bar up or down to adjust the periscope height.
- 4) For maximum height remove the first stop screw on the slide bar.

Flashlight Attachment Instructions:

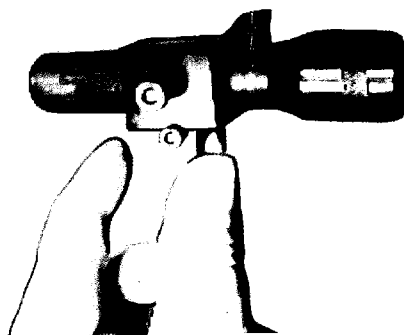

1. Mount a flashlight with up to a one inch diameter handle into the flashlight attachment and tighten down with the tension screw.

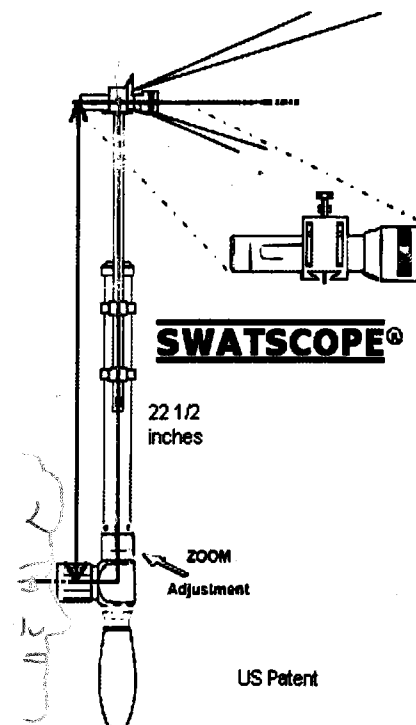

2. To attach pull out the locking pin and slide the flashlight attachment over the beveled mounting bracket on the top prism.

When in place release the locking pin into the locking hole on the beveled mounting bracket.

Note: The attachment is held in position by the spring loaded locking pin.

3. To remove the flashlight attachment from the scope, pull out the spring loaded locking pin and slide the flashlight attachment off the beveled mounting bracket.

SWATSCOPE®

Description:

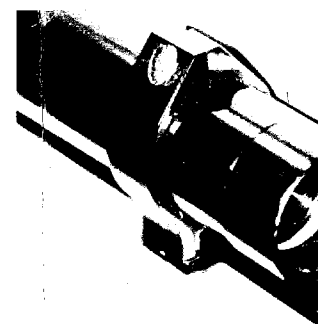

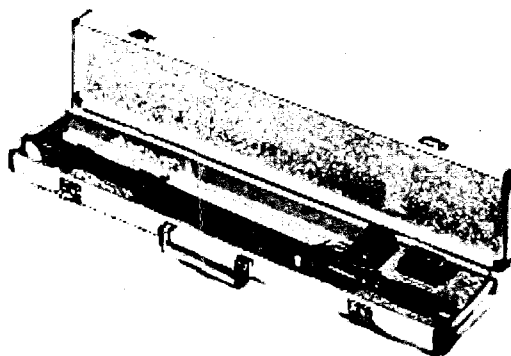

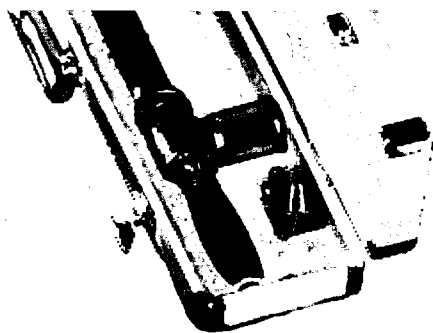

The SWATSCOPE® is a quality, variable power, zoom, hand held periscope, with flashlight attachment capability, allowing the user a surveillance instrument that can also be used in the dark to clear buildings, attics, basements, etc., while remaining out of harms way.

The extendable slide bar provides 22 1/2 inches of height advantage and the zoom lens has a magnification range of 4X to 9X. The SWATSCOPE® can be carried hands free with a belt hook and is stored, ready to use, in an aluminum protective case. The SWATSCOPE® is made of a high quality aluminum alloy, highly polished glass prisms and glass lenses. The eyepiece rubber cup can be folded back for use with glasses. The eyepiece housing and the detachable handle are the only parts made of plastic.

Specifications:

Magnification:	Variable 4x to 9x	SWATSCOPE weight:	18.6 oz
4x field of view:	9.5 degrees	Flashlight attachment:	1.3 oz
9x field of view:	5.0 degrees	Aluminum protective case:	1.86 lb.
Focus distance 4x:	18" to Infinity	Shipping Weight:	3.25 lb.
Focus distance 9x:	8ft. To infinity	Height advantage:	22.5 "
Eyepiece diopter range:	+/- 5 diopter	Extended with handle:	28.125"
