

LASER CURTAINS

Laser Curtains offer a solution to isolating an optics table in a laboratory where there is other than laser research taking place. It greatly reduces the exposure of others to laser light. There are a few vendors for such things. The following is an offering by Kentek. This is not an endorsement of a particular vendor.

FLEX-GUARD™ Medium Duty Laser Curtain Systems

Product #:SLC-M

Laser Protective Curtain System with ceiling-mounted straight track system. Floor-mount and curved track options available.

- Laser-rated at 50W/cm² for 100 seconds
