

INHALATION OF SMOKE, VAPORS AND CHEMICAL FUMES

- Anyone overcome with smoke or chemical vapors or fumes should be removed to uncontaminated air and treated for shock.
- Do not enter the area if you expect that a life-threatening condition still exists such as oxygen depletion, explosive vapors or highly toxic gases (cyanide gas, hydrogen sulfide, nitrogen oxides, carbon monoxide).
- If the victim is unconscious, seek medical attention promptly by calling 911 from any Yale phone.
