

Training

- All authorized x-ray equipment operators must complete the appropriate x-ray safety training starting at <https://ehs.yale.edu/trainings/x-ray-safety>.
- Area frequenters (persons not involved in x-ray activities) must be informed about the presence of x-ray generating equipment and of the rules to follow. See <https://ehs.yale.edu/x-rays> for more info.

Dosimetry

- All authorized x-ray equipment operators are required to wear dosimetry. To request dosimetry badges, please visit: <https://ehs.yale.edu/sites/default/files/files/radiation-service-monitoring.pdf>
- Wear your badge at the collar whenever using x-rays equipment.
- Store badge away from radiation when not being used.
- Never share badges or intentionally expose badges to radiation.
- Return badges in a timely manner at the end of the wear period.

Security

- Turn off your equipment when not in use.
- Always secure keys when x-ray unit is not in use.
- Do not post passwords nearby x-ray control computers and do not leave any keys with your equipment.
- Only trained authorized users should have access to the unit keys.

Closed Beam Safety

- Never bypass a safety device (such as interlocks) for any reason.
- If you are using radioactive material inside the x-ray equipment you need to take Radiation Safety Orientation Training Parts I/II <http://ehs.yale.edu/training/radiation-safety-orientation-part-1>.
- Prevent the spread of contamination inside the x-ray equipment by using absorbent spill pads or trays underneath the radioactive item.
- After use, when the machine is off, survey the x-ray equipment to check for contamination.

Unit Malfunction

- If the x-ray unit appears to malfunction, remove it from service immediately.
- Contact your supervisor and the service representative as soon as possible.
- Make certain other users are aware that the unit is out of service and notify Radiation Safety at the EHS main line 203-785-3550.

New Use or Termination of Use

- Contact EHS prior to purchase, relocation, transfer, donation or disposal of an x-ray unit to ensure all work is handled correctly and in accordance with Connecticut Department of Energy and Environmental Protection regulations. Ionel Hau is the EHS contact for X-ray Safety matters - Ionel.Hau@Yale.edu

Emergency Procedures

- If you have, or think you have, placed any body part in the path of the primary beam, if there is a suspicion of an x-ray exposure or for any other x-ray related emergency, call the EHS emergency line at 203-785-3555. This line is staffed 24 hours per day, seven days per week.

Questions or concerns? Contact Radiation Safety at 203-785-3550.

Landauer is Yale University's New Radiation Dosimetry Vendor

Please see below for important information on the new dosimeters:

1. The new dosimeters come with a clip that the dosimeter snaps into. **DO NOT RETURN THIS CLIP.** The clip is re-used from quarter to quarter. Simply remove the dosimeter to be exchanged and send back. Then, snap the new dosimeter into the clip. It is important that the plastic tab is removed to properly install the dosimeter in the holder.

2. Badges are delivered to the departmental office, not directly to your lab. If you do not receive your badge, check first with your department administrator, or check your departmental mailbox.
3. To add, alter or cancel a dosimeter, or to ask a question regarding radiation dosimetry, please reach out to dosimetry@yale.edu.

Please watch a [short video](#) summarizing the EHS Dosimetry Program, which includes a tutorial on how to assemble the Landauer OSL dosimeter and holder.
