Shared equipment and objects

COVID-19 can be transmitted from respiratory droplets when an infected person coughs, sneezes, or talks, and by touching a surface or object that has the virus on it, and then touching your mouth, nose, or eyes. To avoid this:

When possible, avoid sharing equipment and objects.

Clean and disinfect shared objects after each use.

Remember that cleaning is and disinfection is supplemental to hand hygiene precautions:

Wash your hands often.

Avoid touching eyes, nose, and mouth with unwashed hands.
