

SWINGS AND HAMMOCKS ON CAMPUS

Yale prohibits the use and attachment of weight bearing ropes, slings, belts, bands and other attachments to trees for recreation or leisure purposes without approval from Environmental Health and Safety (EHS), Facilities and Risk Management. This requirement is to help maintain the health and vitality of the trees while minimizing personal safety risks to the Yale community. This guideline specifically applies to hammocks and swings. For more information, please contact ehs@yale.edu.
